Dear Mr. Salley,

This letter is in regard to the tank removal at Ned Martin's farm on Highway 89 in Mt. Airy, NC. We removed 1-2,000 gallon UST. We took samples at each end of the tank as shown on our drawing. The fuel pump was located almost over the tank as shown on the drawing. The tank was used for gasoline storage and there was no contamination present. This tank was 64" x 12' long and had 3' of cover from top of ground to top of tank. The samples were taken 18" below base of tank at a depth of 10' from ground level. No ground water was encountered during sampling. The method used to take these samples was using a split barrel core sampler from the center of dirt in the backhoe bucket taken from the tank hole. The samples were placed in containers furnished by the lab and packed on ice and transported to Blue Ridge Labs in Lenoir, NC. The owner has retained possession of these tanks, not to be reused for petroleum storage. The tanks were pumped clean and hauled to owners property. All excavations have been closed and compacted. If you have any questions please contact me.

Sincerely,

Michael R. Collins
